

slot antenna

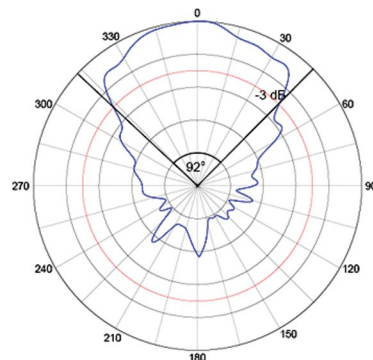

GigaSektor 16dBi/90

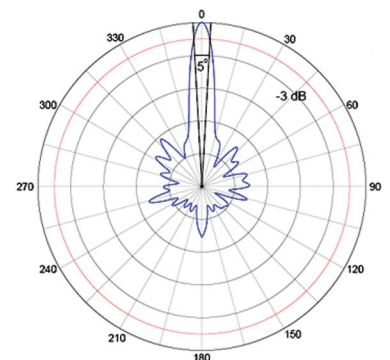

Sector antenna of vertical polarization designed to work on 5 GHz band. It has flat characteristic of gain on wide range of frequency. 16 dBi gain enables user to create links for a large distances.

Modern and weatherproof design of the GigaSektor 16dBi/90 enables user to use antenna in hard to reach places.

specifications

Gain
16 dBi
Frequency
5450 - 5750 MHz
Polarization
vertical
Backward Radiation
n/a
Vertical Beamwidth
7° for -3 dB
Horizontal Beamwidth
90° for -3 dB
VSWR
1 to 1,5
Impedance
50 Ohm
Connector
N/Female type
Dimensions
456/140/40 mm
Weight
560 g
Mounting Kit
diameter 30-50 mm
Wind Loading
80 m/s
Warranty
36 months
