

slot antenna

GigaSektor 16dBi/120 6GHz

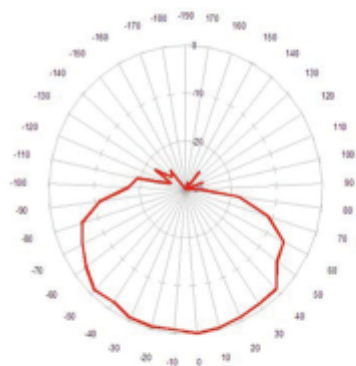

Sector antenna of vertical polarization and 15 – 16 dBi gain, designed to work on 5,9 – 6,1 GHz.

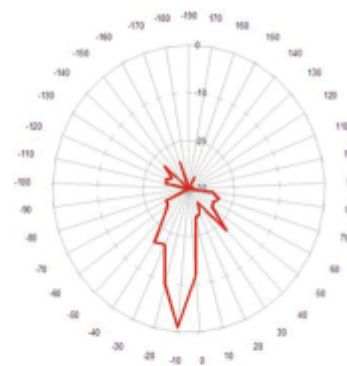

It has 100-120° horizontal beamwidth of 3 dB and under 11° for vertical beamwidth.

GigaSektor 16 dBi/120 is used to work as base antenna and has closed circuit for DC.
